

UNILAND HEAT TRANSFER OIL

UNILAND HEAT TRANSFER OIL is specially formulated industrial grade lubricant for use as a heat transfer oil. It is formulated using highly refined hydrotreated base oils combined with advanced additive technology. This formulation enhances system cleanliness and helps prevent carbon deposits that can obstruct pipelines. Furthermore, the high-quality base oil offers excellent oxidation resistance, ensuring reliable and long-lasting performance.

APPLICATION / BENEFITS

UNILAND HEAT TRANSFER OIL provides:

- Excellent thermal stability and strong resistance to oxidation
- Extended service life with superior system cleanliness
- Offers an efficient heat transfer coefficient
- Features low vapour pressure for enhanced operational safety
